CAREER OBJECTIVE

Java/Spring Developer (Fresher) with hands-on experience building backend and full-stack systems in Java, Spring Boot, and REST APIs. Comfortable with object-oriented design, multithreading, and database-backed services; looking to contribute to a professional backend engineering team.

SKILLS & TOOLS

Languages: Java (Core & Advanced), JavaScript

Backend: Spring, Spring Boot, RESTful APIs, JDBC, Servlets

Core Concepts: OOP, SOLID & DRY Principles, Data Structures & Algorithms, Multithreading & Java Concurrent Package, Networking Fundamentals

Database: MySQL, MongoDB, Spring Data JPA, SQL

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS

Security: JWT, RSA/AES Encryption (Hybrid Cryptography)

Tools: Git, GitHub, VS Code, IntelliJ, Postman

AI Integration: Spring AI, Gemini API

PROJECTS

UPI Offline Mesh — Deferred Settlement System

Java · Spring Boot · Spring Data JPA · Multithreading

- Built a Spring Boot backend simulating offline UPI-style payments relayed device-to-device through a Bluetooth-style mesh network until reaching internet connectivity.
- Implemented hybrid RSA-2048 + AES-256-GCM encryption to keep payment data unreadable to intermediate relay nodes in transit.
- Designed an idempotency mechanism using atomic compare-and-set on ciphertext hashes, guaranteeing exactly-once settlement even when a payment arrives through multiple concurrent bridge nodes.
- Validated correctness with concurrency tests simulating simultaneous duplicate delivery and tampered-payload rejection.

Smart Email Assistant

Java · Spring Boot · Spring AI · Gemini API · REST APIs

- Built a Smart Email Assistant backend using Spring Boot and Spring AI, integrating Google's Gemini API to generate context-aware email reply drafts.
- Designed REST endpoints that accept incoming email content and return AI-generated replies, with configurable tone/style parameters passed through to the model prompt.
- Structured the Spring AI service layer to keep prompt construction, model invocation, and response handling decoupled for easier maintenance and future provider swaps.

EDUCATION

B.Tech, Computer Science & Engineering

Aug 2020 – June 2024

ABES Engineering College

Senior Secondary (ICSE)

2019 – 2020

St. John's School

CERTIFICATIONS & LEARNING

- The Complete Full-Stack Web Development Bootcamp — Udemy (April 2025)
- Java Full-Stack Development Course — QSpiders
